

Axis Crystal Loader

Your source for leading-edge surface processing solutions

FEATURES

- A wafer size range of 100mm - 200mm
- A handling wafer thickness range of 300um - 1200um
- Cassette capability for single and double slots
- Substrate Material Tested: AlTiC, BK7, Borosilicate Glass, Eagle HG, Fused Silica, GaAs, GaN, Sapphire, and Silicon.

The Axis Crystal Loader is the perfect automatic thin wafer handling upgrade for the Surface and IPEC 472 wafer polishers. Wafers are fully supported on the loading chuck; and when you couple the Axis Crystal Loader with our Crystal Carriers, breakage is eliminated during loading and polishing.

Features includes:

- A wafer size range of 100mm - 200mm
- A handling wafer thickness range of 300um - 1200um
- Cassette capability for single and double slots

Substrate Material Tested:

AlTiC, BK7, Borosilicate Glass, Eagle HG, Fused Silica, GaAs, GaN, Sapphire, and Silicon.
