

# VOYAGER FINAL PAD CONDITIONER

Your source for leading-edge surface processing solutions

As a part of the final pad conditioner system, the Voyager fits the bill for all 472/Surface tools. The Voyager offers before, during, and after final platen pad conditioning. As a result, the final platen can attain process results comparable to a process run on the primary platen, making it possible for customers to run two primary processes on both 472 platens.

The Voyagers includes:

- Flexible Zone Programmable Timing
- Eight Preset Recipes for ease of use
- Ten Open Slots for customer's programable recipes
- PC Downforce 2lbs – 10lbs

SPECIFICATIONS/DETAILS	
Sweep	10 Zones (0.5-10 sec per zone)
RPM	0-150
Pressure	2-10lbs
Disk Size	4"

## FEATURES

- Downforce, sweep, & rotation
- System control & monitor
- Zone-based control
- Reports rpm, force, & status
- Voyager Trajectory screen
