

# CARRIER REBUILD & REFURBISHMENT SERVICES

Your source for leading-edge  
surface processing solutions

Through decades of experience and world-class customer service for your wafer handling capabilities and their important integrated components, Axus Technology offers carrier rebuild & refurbishment services. Axus Engineers fully understand the importance of wafer carrier optimization and maintenance contributions for successfully operating CMP tools at peak performance.

Our carrier rebuild & refurbishment services consist of replacing:

- Membranes
- Rolling Seal
- Hardware
- O-rings

Changing retaining rings is optional.

## FEATURES

- Quick turnaround
- Extensive testing and assessment
- New Axus carriers available if deemed non-refurbishable.
- We service Titan, Profiler, Avalon, Crystal and many more.

For more information about refurbishment services, refurbished tools, or field services from Axus Technology, please contact Parts & Services or visit us at [www.axustech.com](http://www.axustech.com).
